It feels good to be
with my family and
my friends.

We like to do things together.

I like to see my
teachers and my
classmates at
school.

We talk and play
together.

For now, I keep my
distance from
others.

A virus is making
people sick in
places around the
world.

It is a new virus.

It will take doctors
and researchers
time to learn more
about the virus.

Hopefully they will
find ways to help
fight the virus.

The virus is contagious, which means that people can catch it from each other.

The virus effects
people differently.

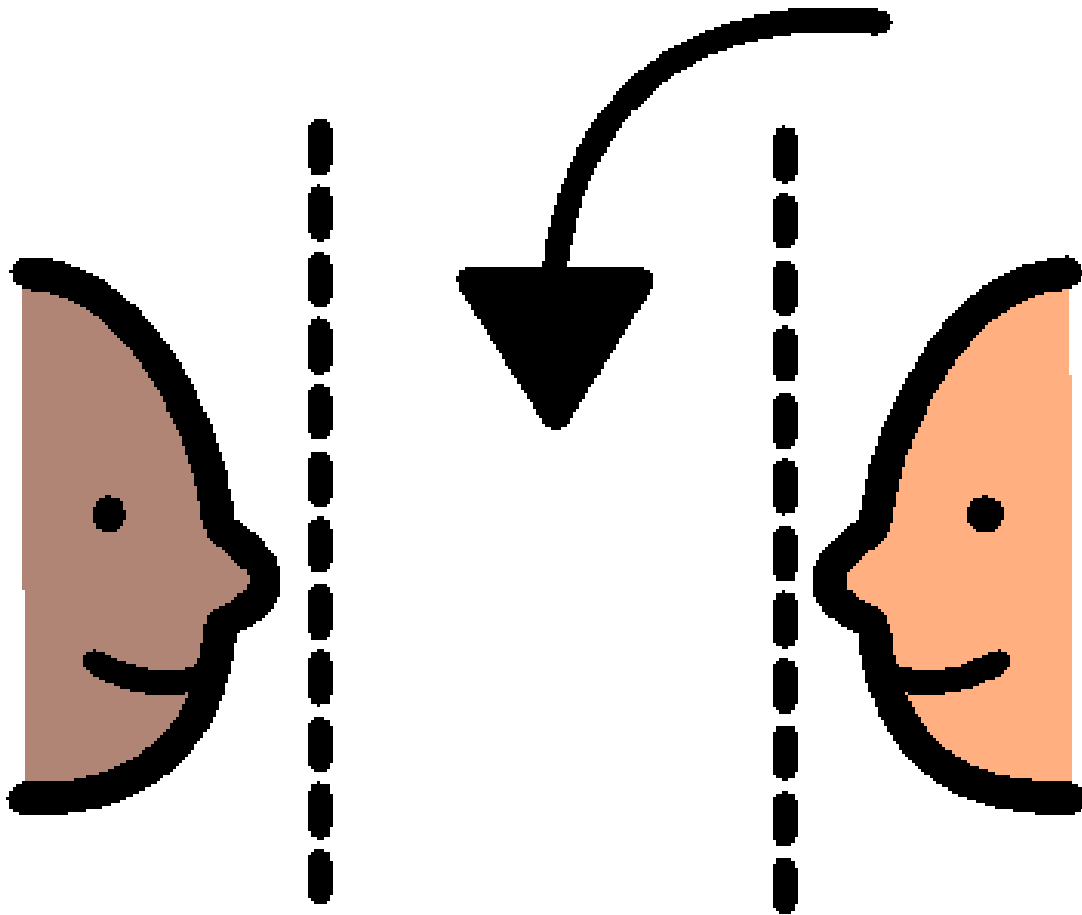

The virus can be especially dangerous for some people.

Health professionals
and world leaders
want people to
participate in
physical distancing.

I stay 2 meters
away from anyone I
don't live with,
whenever possible.

I have a small
bubble of people
that I spend time
with.

I don't travel if I
don't have to.

I avoid going to busy places, especially indoors.

I wait patiently in
line-ups while I am
out running errands.

I wear protection so
that germs are not
shared.

I keep my distance
when I am visiting
others.

I understand when
events are
cancelled or
postponed.

I take a break from
some of my group
activities.

I stay at home with
my family as much
as possible.

I spend time with
my family at home.

I work at home.

I read at home.

I play at home.

I exercise at home.

I practice at home.

I help at home.

I relax at home.

I connect with
others using
technology.

I practice healthy habits.

I open the windows
to get fresh air.

I spend time
outside, keeping
my distance from
others.

Physical distancing
can be frustrating
for everyone.

I am patient during
physical distancing.

I stay positive.

I do my part.

Physical distancing
is an important
strategy to keep
everyone safe and
healthy.

When it is safe, it will
be nice to be close
to others again!
